

Getting the right support for you and your family

The Graded Care Profile

Sometimes parents and carers need a bit of help in looking after their family. We use a form called the Graded Care Profile to find out what help might be useful.

Form

Family

What is the Graded Care Profile?

It helps us to understand the way you look after your child. It's a form that records what is happening for your children day by day. It helps us to see all the things you are doing well and the things you may need help with.

Worker

Worries

Why are we doing it?

A worker who knows you and your family has some worries about how your child is looked after. They will tell you what those worries are.

How is it done?

- It may take one or more visits to your home.
- Sometimes, two workers who know your family may visit together
- The worker will tell you when they are going to visit
- They will tell you if your child needs to be there
- They will talk to you about how you look after your child and write it on a form
- What you say about it will also be written on the form
- They will be honest with you
- It is important for you to be honest with them even if you don't agree with them
- You will get a copy when it is done

Home

Workers

Talk

Form

How will it be used?

The worker may think that there are other people who can help your family:

- The worker will ask if you agree to other workers having information about you
- If you don't agree, the worker will only share information if they think your child needs protection from harm

Agree
